PROFESSIONAL SUMMARY

Driven Software Engineer and 2nd-year Computer Science undergraduate specializing in full-stack development and backend systems architecture. Adept at building scalable web applications using React.js, Tailwind CSS, Flask, and PostgreSQL. Highly motivated team player seeking to leverage strong problem-solving skills and academic excellence in a challenging 2026 software engineering internship.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, Assembly (NASM)

Frontend: React.js, Tailwind CSS, HTML5, CSS3, Figma (UI/UX Design)

Backend & Databases: Flask, PostgreSQL, SQLite, RESTful APIs

Tools & Methodologies: Git/GitFlow, Postman, ThunderClient, WebSockets, JWT Authentication, WEKA Toolkit (Data Mining)

EDUCATION

Bachelor of Science in Computer Science

University of Nairobi Aug 2024- April 2026 (2nd Yr)

Kenya Certificate of Secondary Education

Strathmore School Jan 2020- Nov/2023 B(Plus)

SOFTWARE ENGINEERING PROJECTS

Project Allocation And Supervision System (PASS) | *React, Flask, PostgreSQL* | Feb 2026 – Present

Built a robust backend system featuring a 14-table PostgreSQL database schema to manage student project pitches and supervisor allocations.

Implemented custom, manually defined database migrations and data seeding to ensure precise control over environmental setups.

Translated Figma UI designs into responsive, dynamic frontend components using React.js, establishing secure JWT authentication for student and supervisor portals.

ParcelPoa - Online Delivery System | *React, REST APIs* | Jul 2024 – Aug 2024

Collaborated on a team to develop a responsive online delivery platform, optimizing the user experience for sellers, agents, and buyers.

Integrated real-time parcel tracking via WebSocket connections and backend RESTful APIs, significantly enhancing process transparency.

Real Estate Management CLI | *Python, SQLite* | Jun 2024

Developed a Command Line Interface (CLI) application to streamline real estate property management and track user interactions.

Engineered the database architecture using SQLite, writing efficient SQL queries to handle property listings and account operations.

Recipe Web Application | *React, Netlify, Render* | May 2024

Built and deployed a full-stack recipe management application utilizing React for the frontend and a JSON server for backend data handling.

Implemented dynamic routing and form handling, allowing users to browse popular foods, view detailed recipes, and submit new entries.

CERTIFICATIONS

Software Engineering Certificate | *Moringa School* | Feb 2024 – Aug 2024

LANGUAGES & INTERESTS

Languages: English (Native), Kiswahili (Professional Proficiency)

Interests: Competitive Chess, Systems Analysis, Machine Learning (kNN & J4.8 classification), Game Theory
